

# QUIZ Time!

TP Creations (All Rights reserved)

## “How Safety-Savvy are you?”

This is yet another of our quiz with overwhelming response - thank you very much for your participation!

Congratulations to the following who had each won a \$30 shopping voucher:

1) PANG YU WEN, AILEEN of Department of Paediatrics

2) LIU YEMEI of Department of Engineering

3) KHU YEE LING of Department of Medicine

The answers are:

Q1. C. Smother the flame immediately by wrapping a fire blanket round her

Q2. C. Observe lab safety rules, follow safe lab procedures

Q3. C. Find out who the culprit is, and what the beaker contains so that you can dispose the liquid properly. Better safe than sorry!

Q4. A. Switch it off, and continue with your experiment. Place a notice beside it to warn others that it is still hot.

Q5. B. Toxic or Poisonous materials!

Q6. B. Radioactivity

Q7. B. Nicely and politely tell him that the pipettes should be decontaminated first before putting them in biohazard bags for disposal.

Q8. C. Stop the burn from progressing by removing clothing saturated with the chemical at once, and the affected skin area placed in cold water for up to 30 minutes to reduce the total area and depth of the burn

Q9. B. Stop him. Mixing acid with bleach will generate highly toxic chlorine vapor.

Q10. C. Report his symptoms to his supervisor, so that he can check whether the fume hood is working properly

**Look out for our next exciting QUIZ Time! created just for you!**

**Who knows, YOU could be one of our next 3 lucky winners!**
