

An Introduction to the Use of Behavioural and Implementation Sciences to Improve Health Outcomes

29 - 30 Nov 2023 (Wed - Thurs) | 9am - 1pm | Venue: NUS, MD11, Lv 1

Register by 13 Nov

As healthcare systems and healthcare workers work under increasingly dynamic and resource-constrained conditions, we need to reconceptualise healthcare and design interventions that are effective and sustainable for the population in the long run.

The objective of this in-person course is to introduce participants to frameworks in behavioural and implementation sciences and ways to apply them. Our experienced trainers will provide healthcare leaders and managers with case examples and strategies to improve the uptake of interventions into routine practices, thereby increasing public health impact and bridging the research-to-practice gap.

This course is a collaboration between NUS Medicine Behavioural and Implementation Science Interventions (BISI) and Centre for Evidence and Implementation.

Learning Outcomes

1. Understand why behavioural and implementation science is important to healthcare.
2. Identify barriers and facilitators that impact the translation of evidence to sustainable practice and system change within healthcare.
3. Describe and apply frameworks for designing an effective behavioural and implementation strategy and apply this to real-world challenges.
4. Describe at least one evaluation design that examines implementation outcomes.

Who Should Attend

- All healthcare professionals and healthcare-related job roles
- Researchers and research-related job roles

Course Accreditation

- Pending accreditation from Singapore Medical Council
- Nurses and Pharmacists may submit a CPE claim application if course is relevant to your scope of practice

From Our Past Participants

"A great introduction for those who are just getting into implementation science as it provides a solid foundation and introduction of different frameworks used to evaluate healthcare interventions and outcomes."

- Rie Tai, Vista Health Pte Ltd

"Excellent trainers and programme structure. The course was an eye-opening experience and I took away great insights!"

- Jayne Tong, Tan Tock Seng Hospital
