## NEWS & ARTICLES

### Equity must be baked into randomized controlled trials

By Springer Nature Editors // *Nature*

Calls for an increased focus on ensuring that research involving RCTs are equitable for participants and target groups, and do not contribute to outstanding social inequities

### Research must do no harm: new guidance addresses all studies relating to people

By Springer Nature Editors // *Nature*

Springer Nature editorial board has developed guidance to fill gaps in existing research ethics frameworks, urging consideration of the potential harms of all research relating to human populations, not just those directly involving human participants

### 'The complexities are staggering.' U.S. plans huge trial of blood tests for multiple cancers

By Jocelyn Kaiser // *Science Magazine*

National Cancer Institute prevention chief discusses the next steps towards the largest US cancer screenest trial undertaken yet

### Half in UK back genome editing to prevent severe diseases

By Ian Sample // *The Guardian*

A new Ipsos survey finds that younger generations are more supportive of genome editing for mild or non-medical conditions than older generations

### African researchers lead campaign for equity in global collaborations

By Holly Else // *Nature*

Researchers at the seventh World Conference on Research Integrity in Cape Town are publishing a statement on research partnerships between LMIC and high-income country researchers

## PUBLICATIONS

### Privacy and Health Practices in the Digital Age

By Monique Pyrrho, Leonardo Cambraia, Viviance Ferreira de Vasconcelos // *American Journal of Bioethics*

This target article aims to review the theoretical framework on privacy in order to overcome the often simplistic debate between the primacy of individual or collective interests

### Ethics of non-therapeutic research on imminently dying patients in the intensive care unit

By Nicholas Murphy, Charles Weijer, Derek Debecki et al. // *Journal of Medical Ethics*

The authors explore the ethical challenges in conducting non-therapeutic research on imminently dying patients and propose a framework for the ethical design and conduct of such research

### Reporting incidental findings from non-biological assessments in human subject research

By Alyssa Pingitore, Ashley Mack, Justin Zhang et al. // *Research Ethics*

Assesses instances of incidental findings arising from non-biological test data in research settings, and whether they should be disclosed to participants

### An Ethical Framework for Presenting Scientific Results to Policy-Makers

By S. Andrew Schroeder // *Kennedy Institute of Ethics Journal*

Proposes a set of ethical guidelines to govern researchers' presentation of information to policy-makers

## BLOG POSTS

### Peter Railton's Uehiro Lectures 2022

By Max Kiener // *Practical Ethics*

Details the recent 2022 Uehiro Lectures in Practical Ethics, with audio/video recordings and transcripts available

### Too much or too little? A summary of the forum on financial incentives to participants in health and breastfeeding research

By Rasita Vinay and Annina Bauer // *JME Blog*

Summarises the forum on financial incentives being offered to participants in health research, with a particular focus on breastfeeding research
