MEU has invited Dr Sean McAleer from University of Dundee to be one of the workshop facilitators. Sean teaches in the Centre for Medical Education, University of Dundee. He anchors the teaching and learning in assessment and medical education research themes in the following programmes:

- Masters Programme in Medical Education
- Postgraduate Certificate in Medical Education for Surgery; and
- Discovery Courses in Medical Education

He has conducted workshops on RIME to health professionals involved in teaching in many international venues. His main interests are in educational climate and assessment processes.

ABOUT THE COURSE

A strong grasp of research methods is necessary to enable teachers to evaluate their teaching programs and institute evidence-based practices for future program design and development. Furthermore, it is essential for an educator to disseminate his/her knowledge and experience in pedagogy and teaching innovations. Therefore, an educator must be proficient in selecting and using research methods.

This module will prepare participants with a sound understanding of the theory and practice of quantitative and qualitative methods of research in medical education and their practical application. The spectrum of activities will include hands-on training and many interactive sessions.

COURSE OUTLINE

Course Topics

- What is educational research?
- Why do we need to do research in education?
- Qualitative and Quantitative research methods used in educational research
- Types of tools used in educational research
 - Questionnaires, development and analysis
 - Interview and Focus Group Discussions
- Data collection and analysis
- Reporting of findings
