SMC-CME accreditation is being finalized.

Accommodation

If you require assistance in securing accommodation, please email jocelynkwan@nus.edu.sg

Course Description

This 4 day program will focus on assessing program outcomes and teaching effectiveness through an intensive and systematic course covering critical assessment issues that face medical educators today. The program will help faculty to develop knowledge and skills to enhance their abilities to measure and assess how effective is the teacher; how effective is the department; and how effective is the faculty.

Program faculty and participants will:

- Develop an institutional vision and mission
- Understand and apply the principles of assessment theory
- Analyze approaches to assessment
- Translate educational goals into measurable outcomes
- Design assessment systems that support continuous quality improvement

The program is intensive, incorporating a variety of interactive teaching and learning formats, including case discussions in small and large groups; presentations and case-based learning. Pre-work assignments and readings will help establish individual and institutional program goals.

Topics of discussion will include:

- Evaluation and assessment
- Systems approaches
- Information technology
- Action planning

REGISTER EARLY as there are only limited seats!
