

**Course Faculty**

**Dujeepa Samarasekera**  
Deputy Head  
Medical Education Unit  
NUS Yong Loo Lin School of  
Medicine  
National University Health System

**Course Description**

Case-Based Learning (CBL) is the process of learning new content and training to critically evaluate and solve problems based on past scenarios, situations and cases. The students learn in small groups with a tutor driven discussion. The tutor will direct students to focus on critical areas and will assist them to achieve the required learning outcomes from the assigned case/s.

The interactive workshop will provide the participants the theory and tips on CBL and will involve hand-on small group work on tutoring and developing cases for student learning.

**Teaching for Effective Learning:  
Case Based Learning**

9th July 2010 (Friday), 8.30am — 5.30pm

Symposium Rooms 2 & 3, Clinical Research Centre (CRC)  
Block MD11, 10 Medical Drive, Yong Loo Lin School of Medicine  
National University of Singapore
