Course Description

E-Learning has become an integral part of curriculum delivery and management in many educational institutions. Using it meaningfully in health professional education improves and enhances the learner performance and enhances convenience as well as lends the flexibility for the learner to interact with peers, teachers and the curriculum effectively. Integrating relevant e-learning material also help develop the necessary digital literacy skills for a 21st century health professional practice.

This workshop will:

- Introduce the different types of learning models and learning objects
- Share the various types of learning objects used in institutions, with a focus on its implementation in the Yong Loo Lin School of Medicine
- Explore the connection between the learning objects and eLearning
- Discuss the issues pertaining to the concept of learning objects and their implementation.

Teaching for Effective Learning: **E-Learning**
