

### Course Faculty

#### **Goh Poh Sun**

MEU Associate

Associate Professor

Dept of Diagnostic Radiology

NUS Yong Loo Lin School of Medicine

National University Health System

#### **Dong Chaoyan**

Medical Educationalist

Medical Education Unit

NUS Yong Loo Lin School of Medicine

National University of Health System

### Course Outline

Qualitative methods are powerful tools to help educational researchers to develop theory, evaluate programs, and design educational interventions. Using qualitative methods, you can get additional information that you cannot obtain with quantitative methods. Qualitative methods are used to study human behavior and behavior changes, which are not well captured by quantitative techniques. The purpose of this workshop is to guide researchers in designing and implementing qualitative research projects. An overview of qualitative design will be provided along with general recommendations for developing research questions, formulating a hypothesis, analyzing qualitative data, and validating the results.

By the end of the workshop, you will have a better understanding of, and be able to:

- Define and describe qualitative research methods
- Discuss the advantages and disadvantages of qualitative research methods
- List and use techniques to maintain the validity of qualitative research studies

## Qualitative Research Methods in Health Professions Education

24<sup>th</sup> July 2014 (Thursday) 8.30am – 5.30pm

#01-01A, Level 1, Centre for Translational Medicine (CeTM)  
Block MD 6, 14 Medical Drive, Yong Loo Lin School of Medicine  
National University of Singapore
