

### Course Faculty

#### **Goh Poh Sun**

CenMED Associate  
Associate Professor, Dept of Diagnostic  
Radiology  
NUS Yong Loo Lin School of Medicine  
National University Health System

#### **Dong Chaoyan**

Medical Educationalist, CenMED  
NUS Yong Loo Lin School of Medicine  
National University of Health System

### Course Outline

Qualitative research methods are powerful tools to help educational researchers to develop theory, evaluate programs, and design educational interventions. Using qualitative methods, you can obtain additional information which is not well captured by quantitative techniques. An overview of qualitative design will be provided along with general recommendations for developing research questions, formulating a hypotheses, and collecting qualitative data. The participants will gain hands-on experience in designing a qualitative study, formulating research questions, and practicing interview and focus group discussions – two commonly used data collection approaches in health professions education.

By the end of the workshop, you will have a better understanding of, and be able to:

1. Define and describe qualitative research methods
2. Discuss the advantages and disadvantages of qualitative research methods
3. Formulate qualitative research questions
4. Conduct interview and focus group discussions

## **Qualitative Research Methods in Health Professions Education : Introductory** 4<sup>th</sup> May 2015 (Monday) 8.30am – 5.30pm

#01-01B, Level 1, Centre for Translational Medicine (CeTM)  
Block MD 6, 14 Medical Drive, Yong Loo Lin School of Medicine  
National University of Singapore
