

NUS-Priority Research In Medical Education

Perception of Year 3 Medical Students on Ambulatory Teaching Among Sub-specialties

Ambulatory teaching is one of the major component of undergraduate and post graduate education and there is no formal evaluation for sub-specialties ambulatory clinic in our institution. This study seek to assess the quality of medical teaching in this setting, by assessing the perception of Year 3 medical students using Med-Edu questionnaires.

Dr Thiha Ohn KYAW

Advanced Internal Medicine Department, NUS Yong Loo Lin School of Medicine

Dr Kyaw is currently working as a Consultant in Advanced Internal Medicine and Clinical Instructor in NUS Yong Loo Lin School of Medicine. He is currently involved in undergraduate education as the Undergraduate Program Director for Department of AIM and a core faculty in senior residency program for AIM.

How to Evaluate the Efficacy of a Student-run Homecare Project?

Tri-Generational Homecare is a student-run project where university undergraduates from healthcare faculties, together with students from secondary schools from the neighbourhood, conduct fortnightly home visits to at-risk elderly. The presentation will cover the variables we are interested in measuring, the scales we use, the preliminary analyses of our data, the problems and limitations we face in conducting our research, and possible future directions.

Ms LEUNG Yao Chi Gloria

NUS Yong Loo Lin School of Medicine

Gloria is a fourth year medical student at Yong Loo Lin School of Medicine, National University of Singapore. She has been part of the committee for TriGeneration Homecare for the last three years and is now leading the Research Committee. She is an avid musician, playing the piano, ukulele and oboe.
