

NUS-Priority Research In Medical Education

Motivation, Mindset and Grit of Residents Preparing for PACES

Mindset and Grit have become popular theories in modern achievement psychology. A fixed mindset is characterised by the belief that basic traits (such as intelligence) are fixed, whereas those with a growth mindset believe that they can be developed. Grit is characterised by the perseverance and passion to achieve long-term goals. Both theories suggest that motivation is a more important determinant of success than inherent ability.

Dr Darius BEH

University Medicine Cluster, National University Health System

Dr Darius Beh is currently in his third year of Internal Medicine (IM) Residency at the National University Health System (NUHS). During his time as Chief Resident, he has been involved with efforts to improve the structure and delivery of post-graduate education.

Can Anonymized Competition Influence Neurology Faculty Feedback Scores in GME?

Competition influences behaviour, eg. smoking cessation and resident learning. The effect of competition on faculty teaching is unknown. We examined how anonymous competition (AC) influenced resident-rated faculty teaching scores in our Neurology department.

Dr Yasmin IDU JION

Department of Neurology, National Neuroscience Institute

Dr Yasmin Idu Jion is a consultant neurologist at National Neuroscience Institute in Singapore where she has been working at since 2010. In addition to clinical practice, Yasmin is involved in the teaching of medical students from the various medical schools and residents.
