

# NUS-Priority Research In Medical Education

## Perceptions of Characteristics of Effective Clinical Teachers among Medical Students and Residents in an Asian Healthcare Setting

The purpose of this study is to explore the perceived characteristics of an effective clinical teacher among medical students compared to residents graduating from an Asian medical school, and specifically whether there are differences between cognitive and non-cognitive domain skills, to inform faculty development. Using a pragmatic qualitative research design, maximal variation sampling of 6 final year medical students at the Yong Loo Lin School of Medicine, National University of Singapore, and 6 residents from the NUHS Residency programme, was done through semi-structured one-on-one interviews. Analysis was done using a 3 step approach based on principles of Grounded Theory.

### A/Prof Shirley OOI

Emergency Medicine Department, National University Hospital

Associate Professor Shirley Ooi is a Senior Consultant at the Emergency Medicine Department NUH as well as the Designated Institutional Official of the NUHS Residency programme. Her passion is in teaching and mentoring. She has won multiple teaching awards including the National Outstanding Clinician Educator award in 2013. She has just received her MHPE-S in 2017. She has written 3 books.

## Teaching Neurological Localisation through (Non-serious) Games – A Treasure Hunt Experience

Please don't tell your 3rd year students about this! They don't realise that the neurological-localisation session in NUH will not be a didactic 3 hour lecture! (The disappointment of that could crush some of them). Instead, students unlucky enough to come under me will be divided into teams and participate in an amazing race through campus using clinical and anatomical clues. As if that weren't enough trauma, when they come back they still have to share and teach about their clinical clues and how they solved the clinical conundra (conundrums? I don't know- I'm just a dumb neurologist- come anyway!)

### Dr Derek SOON

Department of Neurology, National University Hospital

Dr Soon is a Senior Consultant in Neurology, at the National University Hospital, and is heavily involved in various aspects of undergraduate and postgraduate education. He is particularly interested in neuroscience, education and the interplay between the 2. He loves his wife, daughter, dog and cycling (generally but not always necessarily in that order).

**Date : 7 May 2018 (Monday)**

**Time : 12.30pm - 1.00pm (A/Prof Ooi), 1.00pm - 1.30pm (Dr Soon)**

**Venue : Room T11-03, Level 11, NUHS Tower Block, 1E Kent Ridge Road, Singapore 119228**

Lunch will be provided from 12noon to 12.30pm. Please RSVP at <https://www.surveymonkey.com/r/NUS-PRIME7May2018>\* by 1 May for catering purposes.
