

Teaching & Learning Strategies for The Healthcare Professionals in The New Millennium

Feedback from past participants...

"Better understanding of steps involved in Problem-based and Team-based learning."

"Practical opportunities with real time feedback - this was extremely exciting and useful!"

Course Description

The education of medical / healthcare professionals today must be able to meet the challenges, demands and expectations of their patients in the 21st century. Educational paradigms have changed significantly over the years to match the requirements of a "cognitive age" in a globalised, knowledge-based economy, and also be consistent with current understanding of how people learn. The changing educational paradigms will impact strongly on the educational preparation of medical / healthcare professionals.

This workshop will facilitate understanding of the major changes in educational paradigms and how such changes will impact on the education of doctors and other healthcare professionals in the 21st century. The major focus of this workshop will be on:

- Learning in a digital age (including a re-appraisal of the teacher's role)
- Shifting the educational paradigm from instruction to learning
- Globalisation of healthcare and how this has impacted medical / healthcare education

DATE: 19 March 2019, Tuesday

TIME: 9.00am - 5.00pm

VENUE: National University of Singapore,
Multipurpose Hall (MPH) 1, MD 1,
