

NUS-Priority Research In Medical Education

Use of Standardised Patient in Patient Education: A Mixed Methods Study

Patient education is a critical component of patient-centered care as it promotes patient's autonomy and involvement in decision-making. Nursing students are required to achieve competency in core skills such as communicating and providing patient-centered care to their patients during their clinical practicum (CP). Traditionally, patient education has been taught through peer role-play. This approach has its limitation as it lacks the realism of the clinical setting. In this presentation, the experience of the nursing students and results of the use of standardised patient for their patient education session will be discussed.

Ms Siriwan LIM

Alice Lee Centre for Nursing Studies, NUS Yong Loo Lin School of Medicine

Ms Siriwan is a Senior Lecturer at Alice Lee Centre for Nursing Studies (ALCNS), Yong Loo Lin School of Medicine, National University of Singapore (NUS). Siriwan is trained as a Critical Care Nurse, Infection Control Practitioner and Nurse Educator. Her research areas of interest are chronic disease in particular patient empowerment and nursing innovation in education.

Critical Decision Making by Residents during the Performance of Laparoscopic Cholecystectomy- Are our Residents Safe or Unsure?

More than 500 laparoscopic cholecystectomies are performed yearly at our tertiary care hospital. A majority of the routine cholecystectomies are being performed by surgical residents supervised directly or indirectly by consultants. Given the high volume of procedures and the serious long term effects of common bile duct injuries, we thought it is important to explore the critical intraoperative decisions that contribute to a culture of safety in cholecystectomy, using actual surgical case scenarios.

Dr KOURA Aaryan Nath

Division of Upper GI Surgery, Department of Surgery, Tan Tock Seng Hospital

Dr Koura is a Senior Consultant at the Department of Surgery, Tan Tock Seng Hospital and an Adjunct Assistant Professor at NUS Yong Loo Lin School of Medicine. He is a Core Faculty of the NHG Surgical Residency Program and National Examiner for General Surgery.

Date : 5 August 2019 (Monday)

Time : 12.30pm - 1.00pm (Ms Lim), 1.00pm - 1.30pm (Dr Koura)

Venue : Symposium Room, Level 1, MD11, 10 Medical Drive, Singapore 117597

Lunch will be provided from 12noon to 12.30pm.

Please RSVP through the CenMED Registration Portal via link or QR code (**account registration is required for new users**) by 30 July for catering purposes:
