

Simplicity – The Ultimate Sophistication in Medical Education

Speaker:

Prof C Rajasoorya

Senior Consultant

Internal Medicine and Endocrinology

Sengkang General Hospital

Chairperson:

A/Prof Tan Kong Bing

Senior Consultant

Department of Pathology

Yong Loo Lin School of Medicine

National University of Singapore and

National University Health System

Technological advancement, pedagogy-research, and the milieu in which we practice drive medical education. Medical education cannot deviate from the primary intention of transmitting knowledge in a manner that is understood and assimilated by the learner. As experts with a bounty of knowledge and experience, we tend to get too enthusiastic in transmitting all these to our students. Where complicated, transmission failure occurs, killing the joy of learning. The talk will raise an argument for a conscious attempt in simplicity – illustrating with examples that the art of simplification is neither easy nor accomplished without effort but can contribute to lessons being more comprehensible and memorable (“stickier”).
