

DEVELOPING THE FUTURE-READY HEALTHCARE PROFESSIONALS – OUTCOMES AND ENTRUSTABLE PROFESSIONAL ACTIVITIES (EPA)

Feedback from past participants...

“Better understanding of EPA and the difference between milestones and EPA”

Course Description

Today, an *outcome-based* education (OBE) model is strongly advocated for the design and delivery of 21st century health professional curriculum: the professional competencies required for future practice are defined in terms of the intended learning outcomes (i.e. the knowledge, skills, attitudes) formulated from and aligned to the end-product capability (i.e. the desired attributes of the end-product) identified. Learners need to provide evidence of having acquired the desired professional competencies by **passing examinations** which use assessment tools (e.g. MEQs, OSCEs) designed for such a purpose.

However, in the *clinical setting* (i.e. in the *work environment*), it is recommended that learners need to show evidence that they have acquired desired professional competencies by **independently performing** a given set of **professional tasks**, after a period of learning under supervision. Such ‘professional tasks’ performed by the learner independently are referred to as the **‘Entrustable Professional Activities (EPAs)’**. Workplace-based assessments tools (e.g. Mini-CEX, DOPS) should be used for assessing EPAs.

Workshop Objectives

At the end of the workshop, participants should be able to:

- Discuss the *key features* of EPAs
- Provide participants with hands-on experience on how to *formulate* EPAs in their respective disciplines
