

Technology-Enhanced Learning

Feedback from past participants...

"Succinct and focused on what needs to be communicated."

"Trainers are very engaging."

Course Description

Technology-Enhanced Learning is everywhere with the influx of new technology and has become an accepted educational tool and platform to support and augment teaching and learning in health professions education. To keep up with what's changing (and what isn't), educators must know where to look. Although technology-enhanced learning in health professions education has demonstrated positive learning outcomes, promotes interaction between students/trainees and instructors, and positive assessment outcomes, significant body of research has shown that most teachers have been slow to transform the ways they teach.

This introductory level workshop is designed as an introduction to the topic for beginners and might also be useful as a refresher course for more experienced practitioners to expose the educators on the following:

1. Introduce technology-enhanced learning tools such as use of videos, mobile, and learning management system
2. Introduce technology-enhanced learning modality such as blended learning and flipped classroom.
3. Share a variety of reusable digital learning objects used in undergraduate and postgraduate education, by demonstrating their use at the Yong Loo Lin School of Medicine and National University Health System, Singapore
4. Discuss best practices in technology-enhanced learning

DATE: 6 May 2021, Thursday

TIME : 9.00am – 1.00pm

VENUE : National University of Singapore,
Multipurpose Hall (MPH) 1, MD 1,
Level 3, 12 Science Drive 2,
Singapore 117549
