

Interactive Teaching-Learning Strategies in Small and Large Group Settings

Feedback from past participants...

"Best workshop I have attended so far."

"This workshop was very insightful and made absolute sense in terms of the principles and their application. I am thankful for having the opportunity to attend."

Course Description

Teaching students how to learn using appropriate approaches (large group or small group teaching) has always been a challenge. Large classes should not be limited to lecture-based teaching. Several interactive teaching-learning strategies (also referred to as 'discussion pedagogy') is reviewed as potential strategies for student engagement in their learning. Learning in small groups optimizes, firstly, student engagement in learning, deeper understanding of content knowledge, develops collaborative learning among peers and also develops important domain-independent skills (e.g., communication, team-work) relevant for future practice. However, for the above to be realised, small groups must be effectively conducted through appropriate facilitation skills.

At the end of this workshop, participants should be able to:

- Discuss how to engage students, motivates them to practice higher order thinking skills and promotes meaningful learning using different small and large groups teaching approaches
- Discuss the strengths of each teaching and learning methods
- Discuss key learning principles underpinning the various strategies in teaching and learning.
- Apply the theories and principles in a hands-on sessions
