

ASSESSMENT OF PRACTICAL/CLINICAL SKILLS: MULTI-STATION EXAMINATIONS

Course Description

Developing high quality assessments to evaluate achievements of desired skill sets for future practice is important in medical / health professional educational programmes. This will ensure practice readiness as well as patient safety.

The workshop will explore contemporary best evidence practices in developing multi-station clinical assessment.

The participants will get opportunities to discuss the strengths, limitations and challenges as well as hands-on training developing these clinical skill assessments.

Workshop Objectives

After this workshop participants will be able to:

- discuss the underpinning educational theories behind skills based assessment
- develop competency standards for pass/fail decisions
- develop a skills station based on best practices
- apply skills learnt to one's own practice environment

Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.

Participants' Feedback:

"Feedback from students, examiners, observers helped in highlighting that what you set as a question might mean different things to different people (a student might read a different message, the examiner another – which might be different from the question setter's thought process)."
"I now understand the importance of using SPs."
