

TECHNOLOGY – ENHANCED LEARNING

Course Description

Technology-Enhanced Learning (TEL) is used to describe the application of technology to teaching and learning. Due to the influx of new technology, it has become an educational tool and platform to support teaching and learning in health professions education. It is important for educators to explore the latest trends and innovations in technology-enhanced learning and develop practical skills to enhance student engagement and performance. Although technology-enhanced learning in health professions education has demonstrated positive learning outcomes, promotes interaction between students/trainees and instructors, and positive assessment outcomes, significant body of research has shown that most teachers have been slow to transform the ways they teach.

This introductory level workshop is designed as an introduction to the topic for beginners and might also be useful as a refresher course for more experienced practitioners to expose the educators on the following:

1. Introduce technology-enhanced learning tools such as use of videos, mobile, chatbot (such as Chat GPT) and learning management system
2. Introduce technology-enhanced learning modality such as flipped classrooms, blended learning, mobile learning, social media, and learning analytics
3. Discuss best practices in technology-enhanced learning

Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.

Participants' Feedback:

"Succinct and focused on what needs to be communicated."

"Trainers are very engaging."

3 August 2023, Thursday

1:00pm – 5:00pm

Online

Registration Fees

**NUHS Staff - (\$420 + Prevailing GST)
(Including staff on clinical faculty/adjunct scheme)**

Others - (\$450 + Prevailing GST)

Registration is on a first-come-first-served basis
