

# USE OF PORTFOLIO IN LEARNING AND ASSESSMENT

## Course Description

The origin of the word portfolio is interesting. It is the combination of two words: 'portare' which means 'to carry' and 'follium' which means 'leaf/sheet'. Portfolio is a portable and a living document that collects personal and professional goals, achievements, and reflections in a systematic manner. In health professions education, portfolio has been introduced as a learning as well as an assessment tool. It is well-documented that a portfolio is thought to enhance the assessment of areas that are difficult to assess by traditional methods in a wide range of clinical contexts such as attitudes, personal attributes, reflection and professionalism. However, it is not without its challenges.

## Workshop Objectives

In this workshop, our aims are to explore portfolio-based learning and assessment in greater details and answer the following critical questions:

- What is portfolio?
- What is the purpose of portfolio?
- How does the purpose of portfolio influence the content and organisation?
- How can portfolio help me to support student learning?
- How can portfolios be used for assessments?

## Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.
