

DEVELOPING THE FUTURE-READY HEALTHCARE PROFESSIONALS – OUTCOMES AND ENTRUSTABLE PROFESSIONAL ACTIVITIES (EPA)

Course Description

Outcome-based education (OBE) model is advocated for the design and delivery of 21st century health professional curriculum. Learners need to show evidence that they have acquired the desired professional competencies by independently performing a given set of professional tasks, after a period of supervised learning. Such 'professional tasks' performed by the learner independently are referred to as the 'Entrustable Professional Activities (EPAs)'. This workshop will cover the principles and operationalising of EPAs based on an outcome-based blueprint.

Workshop Objectives

At the end of the workshop, participants should be able to:

- Describe the principles of outcome-based health professions education
- Develop key learning outcomes
- Discuss the key features of EPAs
- Formulate EPAs in their respective disciplines
- Develop a blueprint for EPAs closely aligned to the professional competencies identified
- Develop assessment frameworks aligned to EPAs
- Discuss challenges and way forward

Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.

Facilitators

Dujeepa Samarasekera
Senior Director, CenMED
