

PROVIDING EFFECTIVE FEEDBACK TO ENHANCE LEARNING

Participants' Feedback:

"Have gained a lot of knowledge and information on how to provide effective feedback"

"Practical applications to try when back at work"

Course Description

The ability to provide and receive feedback is important in the current learning context to improve the educational setting as well as to monitor the progress of trainees and trainers. If done properly, feedback will have a transformative effect on the person as well as the practice environment. It is therefore imperative that one is trained in giving both positive and negative feedback skillfully.

The workshop will focus on feedback techniques and discuss on how to develop good practices as well as identify bad practices. Training will be in small groups and will focus on current learning environments of undergraduate and postgraduate settings.

Workshop Objectives

After this workshop participants will be able to:

- Apply the educational principles learnt into practice while providing feedback
- Evaluate effectiveness of providing feedback in various educational teaching learning settings
- Facilitate effective feedback practices in their work environments

Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.

27 May 2024, Monday
