

QUALITATIVE RESEARCH METHODS IN HEALTH PROFESSIONS EDUCATION

Course Description

Qualitative methods are powerful tools to help educational researchers to develop theory, evaluate programmes, and design educational interventions. Using qualitative methods, you can collect in depth information that you cannot obtain with quantitative methods. Qualitative methods are used to study human behaviour and behaviour changes, which are not well captured by quantitative techniques. The purpose of this workshop is to guide researchers in designing and implementing qualitative research projects. An overview of qualitative research design will be provided along with general recommendations for developing research questions, formulating a hypothesis, analysing qualitative data, and validating the results.

Workshop Objectives

By the end of the workshop, you will have a better understanding of, and be able to:

1. Define and describe qualitative research methods
2. Discuss the advantages and disadvantages of qualitative research methods
3. Describe the data collection methods in qualitative research (interview, observation and focus group discussions)
4. Analyse a simple qualitative data
5. Plan a qualitative research

Who should attend?

All Healthcare Professional Educators (doctors, dentists, pharmacists, nurses and allied health professionals) and administrative staff who teach, develop and manage education programmes are welcome to attend.

Participants' Feedback:

"Interactive pre-reading materials – the videos are excellent & engaging."

"I really learn a lot in this way more than a traditional lecture delivery style."

**14 August 2024, Wednesday &
15 August 2024, Thursday**

9:00am – 5:00pm

**National University of Singapore
14 Medical Drive
MD6, Centre for Translational Medicine
#01-01B, Singapore 117599**

Registration Fees

**NUHS Staff - (\$690 + Prevailing GST)
(Including staff on clinical faculty/adjunct scheme)
Others - (\$720 + Prevailing GST)**

Registration is on a first-come-first-served basis
