

PREPARING HEALTH PROFESSIONAL EDUCATORS FOR THE AI ERA

**Tuesday, 24 November 2026****NUS MD1, MPH 2****9:00am – 5:00pm**

This one-day workshop provides educators with both a strong foundation in generative artificial intelligence (AI) and practical experience applying AI to teaching, learning, curriculum design and assessment. Participants will explore the key principles and pedagogical frameworks for effective AI integration, examine real-world educational use cases and discuss ethical, legal and academic integrity considerations. Following the introduction of commonly used AI platforms, participants will engage in hands-on AI activities to design learning materials, create assessments, enhance marking and feedback, and develop effective prompting techniques that are used responsibly to ensure accuracy, sound pedagogy and alignment with learning outcomes.

By the end of the workshop, participants will be able to:

- Explain the key principles and pedagogical frameworks for integrating AI into education.
- Apply AI to curriculum design, assessment development, marking and feedback.
- Recognise ethical, legal and academic integrity considerations and promote the responsible use of AI.
