

## **SIMULATION BASED LEARNING: BASIC INSTRUCTORS' COURSE**

**Nicola Ngiam, Gerald Chua and Tan Eng Kien**

This workshop is an introduction to the scope of medical simulation as well as to basic instructor skills. The target audience will be educators in a current or prospective simulation program. Faculty will explore concepts involved in running a simulation program, developing simulation scenarios and instructor skills. The format will include lectures, small and large group discussions, practical exercises and exposure to simulation equipment and scenarios. Workshop topics will include teaching clinical thinking and skills, teaching teamwork and crisis resource management and developing debriefing skills.
