

WORKPLACE BASED ASSESSMENT

John Norcini

The goal of this session is to familiarize the participants with some of the workplace-based assessments methods currently being used. It will highlight the importance of formative assessment in learning, review some of the research on the methods, present a model for faculty development, and describe some of the current research on feedback to trainees. Active participation will be encouraged throughout and small group activities will focus on developing a faculty consensus on assessment standards and using the methods to provide effective feedback to trainees.
