

FUNDAMENTALS & DEBRIEFING IN SIMULATION-BASED HEALTHCARE EDUCATION

Course Code: OPEN-SOM-CHSFDSBHE

Take your teaching to the next level with this practical, hands-on course designed for healthcare educators who want to enhance learner engagement and outcomes through simulation. Whether you are new to simulation or looking to sharpen your existing skills, this course equips you with the tools, techniques, and confidence to effectively incorporate simulation-based education into your curriculum.

COURSE DATES: 24 – 26 FEB 2026 (3 DAYS)

KEY LEARNING OUTCOMES

- ✓ A strong foundation in healthcare simulation principles
- ✓ Skills to design and run effective lesson plans and simulation scenarios
- ✓ Techniques to assess and improve learner performance
- ✓ Practical experience with debriefing models and facilitation strategies
- ✓ Insights into common challenges and how to overcome them
- ✓ Tools you can immediately apply in your day-to-day teaching and clinical training

Through group work, real-world scenarios, and expert feedback, this course empowers you to create engaging, impactful, and sustainable simulation-based learning experiences.

WHO SHOULD ATTEND

- Doctors
- Nurses
- Healthcare Educators

COURSE FEES

\$2,550 SGD
(EXCLUDING GST)
