Season 3 of "Outbreaks: Updates and Analyses" is here!

Building on the success of our previous seasons, this highly anticipated webinar series returns with fresh insights into emerging infectious diseases. Bringing together the world's foremost clinicians, scientists, public health officials, and policymakers, we'll explore the latest developments, challenges, and strategies in outbreak management.

Our well-known resident hosts: Prof Dale Fisher, Dr Louisa Sun and Assoc Prof David Allen will be joined by other global experts in the field. They'll deliver episodes packed with timely updates and unparalleled global perspectives.

About this Series

Outbreak: Updates and Analyses is a flagship webinar series by the Centre for Infectious Disease Emergency Response (CIDER) at the National University of Singapore, Yong Loo Lin School of Medicine. We aim to help build a global community of professionals equipped to tackle infectious disease emergencies through collaboration and education.

What You'll Gain

- Cutting-edge insights on emerging infectious diseases.
- Understand global responses and preparedness strategies.
- Engage with top infectious disease experts.
- CME points for those with Singapore medical registration.
