

# Ethics and Professionalism in Healthcare

**Course Delivery Mode: Online (Zoom)**

**Monday, 28 Mar 2022**

**9am - 6pm**

**REGISTER BY 14 MAR**

This course is specially designed for non-clinical healthcare professionals who are interested to explore, address and better understand the ethical and professionalism issues in a healthcare setting. The common types of ethical and professional challenges encountered in the world of health informatics, data, privacy and security will be discussed, as well as, how these issues can be identified and addressed via an effective and professional approach.

This interactive course will provide learners with opportunities to discuss and analyse use cases and the application of ethics, morals and values. With the knowledge and skills gained from this course, learners will be able to provide invaluable support in their respective non-clinician support roles such as medical social workers and case coordinators.

## COURSE OBJECTIVES

At the end of this course, learners will have an:

- Overview of Health Informatics
- Overview of the different types of Healthcare Data and Information
