Evidence-Based Practice

Course Delivery Mode: Online (Zoom)

Monday, 4 Apr 2022	9am - 6pm	REGISTER BY 21 MAR

This course is specially designed to provide you with an understanding of the principles of Evidence-Based Practice and its application in clinical care. It introduces the importance of research and methodologies to improve clinical practice and patient care from the wealth of data available from different sources and health systems.

This course will empower learners to use clinical research data to determine and provide optimal patient care. Differerent types of research metholodgies and assessment would be discussed and analysed. Learners will understand the limitations and navigate research data to achieve logical outcome for delivery of healthcare treatments.

COURSE OBJECTIVES

At the end of this course, learners will have an:
- Understanding of the importance of Healthcare Data Analytics, Public and International Health Informatics for research
- Overview of the Regional Health System in Singapore

WHO SHOULD ATTEND
