

Digital Advanced
Technology Accelerator
Yong Loo Lin School of Medicine

In partnership with

NUS Medicine Digital Accelerator Programme

NUS
National University
of Singapore

National University of Singapore

“

Digital health innovation is the future of medicine. Artificial intelligence and digital technologies will create the next medical breakthrough and catalyse the growth of new therapeutics, treatments and vaccines. The NUS Medicine Digital Advanced Technology Accelerator (DATA) aims to encourage the growth of promising ideas in digital healthcare, bring them to fruition and make an impact on global healthcare. By partnering with 22Health, we aim to foster and support a culture of continuous healthtech innovation and enable a thriving digital healthcare ecosystem. The Accelerator is expected to have a significant and sustainable impact on the Singapore innovation community, and we are proud to be a leader in this objective.

Prof Chong Yap Seng
Dean, NUS Medicine

“

At 22Health, we believe that investing in transformative health-tech companies is increasingly important for global health. The Accelerator is well-positioned to accelerate the transition to next-generation health and care and thereby to improve health and wellness for all people.

22Health is proud to collaborate with NUS Medicine. We appreciate that the leading scientific and technology research and academic capabilities of our partner will provide early-stage support and clinical validation to enable Singapore's entrepreneurs to reach increasing levels of global competitiveness.

Paul Scibetta
