

## Associate Professor Vincent Chow's Representative Publications

Lee VJ, Tay JK, Chen MI, Phoon MC, Xie ML, Wu Y, Lee CX, Yap J, Sakharkar KR, Sakharkar MK, Lin RT, Cui L, Kelly PM, Leo YS, Tan YJ and Chow VT (2010) Inactivated trivalent seasonal influenza vaccine induces limited cross-reactive neutralizing antibody responses against 2009 pandemic and 1934 PR8 H1N1 strains. **Vaccine**, 28: 6852-6857.

Li R, Lim A, Phoon MC, Narasaraju T, Ng JK, Poh WP, Sim MK, Chow VT, Loch C and Alonso S (2010) Attenuated Bordetella pertussis protects against highly pathogenic influenza A viruses by dampening the cytokine storm. **J. Virol.** 84: 7105-7113.

Chen MI, Lee VJ, Lim WY, Barr IG, Lin RT, Koh GC, Yap J, Cui L, Cook AR, Laurie K, Tan LW, Tan BH, Loh J, Shaw R, Durrant C, Chow VT, Kelso A, Chia KS and Leo YS (2010) 2009 influenza A(H1N1) seroconversion rates and risk factors among distinct adult cohorts in Singapore. **JAMA**, 303: 1383-1391.

Narasaraju T, Ng HH, Phoon MC and Chow VT (2010) MCP-1 antibody treatment enhances damage and impedes repair of the alveolar epithelium in influenza pneumonitis. **Am. J. Respir. Cell Mol. Biol.** 42: 732-743.

Poh WP, Narasaraju T, Pereira NA, Zhong F, Phoon MC, Macary PA, Wong SH, Lu J, Koh DR and Chow VT (2009) Characterization of cytotoxic T-lymphocyte epitopes and immune responses to SARS coronavirus spike DNA vaccine expressing the RGD-integrin-binding motif. **J. Med. Virol.** 81:1131-9.

Narasaraju T, Sim MK, Ng HH, Phoon MC, Shanker N, Lal SK and Chow VT (2009) Adaptation of human influenza H3N2 virus in a mouse pneumonitis model: insights into viral virulence, tissue tropism and host pathogenesis. **Microbes Infect.** 11: 2-11.

Yeo WM, Isegawa Y and Chow VT (2008) The U95 protein of human herpesvirus 6B interacts with human GRIM-19: silencing of U95 expression reduces viral load and abrogates loss of mitochondrial membrane potential. **J. Virol.** 82:1011-1020

Ho SY, Chua, SQ, Foo GWD, Loch C, Chow VT, Poh CL and Alonso S (2008) The highly attenuated Bordetella pertussis BPZE1 strain as a potential live vehicle for the delivery of heterologous vaccine candidates. **Infect. Immun.** 76: 111-119

Jan ter Meulen, J, van den Brink EN, Poon LLM, Marissen WE, Leung CSW, Cox F, Cheung CY, Bakker AQ, Bogaards JA, Deventer EV, Preiser W, Doerr HW, Chow VT, Kruif JD, Peiris JSM and Goudsmit J (2006) Human Monoclonal antibody combination against SARS coronavirus: synergy and coverage of escape mutants. **PLoS Medicine**, 3:e237

Surjit M, Liu B, Chow VT and Lal SK (2006) The nucleocapsid protein of severe acute respiratory syndrome-coronavirus inhibits the activity of cyclin-cyclin-dependent kinase complex and blocks S phase progression in mammalian cells. **J. Biol. Chem.** 281: 10669-10681

Leong WF and Chow VT (2006) Transcriptomic and proteomic analyses of rhabdomyosarcoma cells reveal differential cellular gene expression in response to enterovirus 71 infection. **Cell. Microbiol.** 8: 565-580

Culiat, CT, Sakharkar KR, Sakharkar MK, Chow VT and Pervaiz S (2006) Functional and evolutionary analyses on expressed intronless genes in the mouse genome. **FEBS Lett.** 580: 1472-1478

Koh WP, Chow VT, Phoon MC, Ramachandran N and Seow ALH (2005) Lack of association between chronic Chlamydia pneumoniae infection and lung cancer among nonsmoking Chinese women in Singapore. **Intl. J. Cancer**, 114: 502-504

Surjit M, Kumar R, Mishra RN, Reddy MK, Chow VT and Lal SK (2005) The severe acute respiratory syndrome coronavirus nucleocapsid protein is phosphorylated and localizes in the cytoplasm by 14-3-3-mediated translocation. **J. Virol.** 79:11476-11486

Sakharkar KR and Chow VT (2004) Exploring genome architecture through GOV: a WWW-based gene order visualizer. **Bioinformatics**, 20(6): 984-985

Liew KJ and Chow VT (2004) Differential display RT-PCR analysis of ECV304 endothelial-like cells infected with dengue virus type 2 reveals messenger RNA expression profiles of multiple human genes involved in known and novel roles. **J. Med. Virol.** 72: 597-609

Lim KM, Yeo WS and Chow VT (2004) Antisense abrogation of DENN expression induces apoptosis of leukemia cells in vitro, causes tumor regression in vivo and alters the transcription of genes involved in apoptosis and the cell cycle. **Intl. J. Cancer**, 109: 24-37

Tan JM, Tock EP and Chow VT (2003) The novel human MOST-1 (C8orf17) gene exhibits tissue specific expression, maps to chromosome 8q24.2, and is overexpressed/ amplified in high grade cancers of the breast and prostate. **Mol. Pathol.** 56:109-115

Goo YH, Sohn YC, Kim DH, Kim SW, Kang MJ, Jung DJ, Kwak E, Barlev NA, Berger SL, Chow VT, Roeder RG, Azorsa DO, Meltzer PS, Suh PG, Song EJ, Lee KJ, Lee YC and Lee JW (2003) Activating signal cointegrator 2 belongs to a novel steady-state complex that contains a subset of trithorax group proteins. **Mol. Cell. Biol.** 23:140-149

Leong PW, Liew K, Lim W and Chow VT (2002) Differential display RT-PCR analysis of enterovirus-71-infected rhabdomyosarcoma cells reveals mRNA expression responses of multiple human genes with known and novel functions. **Virol.** 295:147-159
