

Dr. Volker Patzel's Representative Publications

Patzel V. Antagonists of bacterial sequences. **United States Patent Application Publication** (2010) US2010/0166770 A1

Mantei A, Rutz S, Janke M, Kirchhoff D, Jung U, Patzel V., Vogel U, Rudel T, Andreou I, Weber M, and Scheffold A. siRNA stabilization prolongs knockdown in primary T lymphocytes. **Eur. J. Immunol.** (2008) 38: 2616-2625

Patzel V., Köberle C, Jung U, Dietrich I and Kaufmann SHE. siRNA: novel design and prokaryotic gene silencing. **Inflammation Reserach** (2007) 56: S324

Patzel V. In silico selection of active siRNA. **Drug Discovery Today** (2007) 12: 139-148

Patzel V., Dietrich I and Kaufmann SHE. RNA silencing in the struggle against disease. **Ann. N.Y. Acad. Sci.** (2006) 1082: 44-46

Köberle C, Kaufmann, SHE and Patzel V. Selecting effective siRNAs based on guide RNA structure. **Nature Protocols** (2006) 1: 1832-1839

Patzel V., Rutz S, Dietrich I, Köberle C, Scheffold A and Kaufmann SHE. Design of siRNAs producing unstructured guide-RNAs results in improved RNA interference efficiency. **Nature Biotechnology** (2005) 23(11): 1440-1444

Patzel V. In silico design of functional RNA molecules. **Curr. Opin. Drug Discov. Dev.** (2004) 7(3): 360-369

Köberle C, Patzel V. and Koch I. RNA Analysis and Antisense Oligodeoxyribonucleotide Prediction Tool - RAOPT. **Currents in Computational Molecular Biology** (2003), eds. R. Spang, P. Beziat, M. Vingron. pp.195-196

Patzel V. and Kaufmann SHE. Towards simple artificial infectious systems. **Trends Mol Med.** (2003) 9(11) 479-482

Patzel V. and Sczakiel G. In vitro selection supports the view of a kinetic control of antisense RNA-mediated inhibition of gene expression in mammalian cells. **Nucleic Acids Res.** (2000) 28(13): 2462-2466

Lehmann MJ, Patzel V. and Sczakiel G. Theoretical design of antisense genes with statistically increased efficacy. **Nucleic Acids Res.** (2000) 28(13): 2597-2604

Scherr M, Rossi JJ, Sczakiel G and Patzel V. RNA Accessibility prediction: A theoretical approach is compatible with experimental studies in cell extracts. **Nucleic Acids Res.** (2000) 28(13): 2455-2461

Patzel V. and Sczakiel G. Length dependence of RNA-RNA annealing. **J. Mol. Biol.** (1999) 294(5): 1127-1134

Patzel V., Steidel U, Kronenwett R, Haas R and Sczakiel G. A theoretical approach to select effective antisense oligodeoxyribonucleotides at high statistical probability. **Nucleic Acids Res.** (1999) 27(22): 4328-4334

Längle-Rouault F, Patzel V., Benavente A, Taillez M, Silvestre N, Bompard A, Sczakiel G, Jacobs E and Rittner K. Up to 100-fold increase of apparent gene expression in the presence of Epstein-Barr virus *oriP* sequences and EBNA1: implications of the nuclear import of plasmids. **J. Virol.** (1998) 72(7): 6181-6185

Patzel V. and Sczakiel G. Theoretical design of antisense RNA structures substantially improves annealing kinetics and efficacy in human cells. **Nature Biotechnology** (1998) 16(1): 64-68

Patzel V., Kronenwett R, Rittner K and Sczakiel G. Fast RNA-RNA annealing *in vitro*: single cycle selection versus multiple cycle selection. **Nucleotides & Nucleosides** (1997) 16(5&6): 711-715

Patzel V, zu Putlitz J, Wieland S, Blum HE and Sczakiel G. Theoretical and experimental selection parameters for HBV-directed antisense RNA are related to increased RNA-RNA annealing. **Biol. Chem.** (1997) 378: 539-543

Patzel V and Sczakiel G. The hepatitis B virus posttranscriptional regulatory element contains a highly stable RNA secondary structure. **Biochem. Biophys. Res. Commun.** (1997) 231: 864-867

Sczakiel G, Eckstein F, Homann M, Marschall P, Nedbal W, Oelze I and Patzel V. Inhibitory nucleic acids in HIV-1: Antisense RNA and ribozymes. **Acquired Immune Deficiency Syndrome Research** (1994) 9(11): 581

Patzel V and Sczakiel G. Concept for extensive in vitro selection of fast-hybridizing antisense RNA. **Biol. Chem. Hoppe-Seyler** (1994) 375: S79

List HJ, Patzel V, Zeidler U, Schopen A, Rühl G, Stollwerk J and Klock G. Methylation sensitivity of the enhancer from the human papillomavirus type 16, **J. Biol. Chem.** (1994) 269(16): 11902-11911
