

Objectives and Programmes – Chemical Spill Response Hands-On Workshop

The Department's safety and health objectives for 2023 was to Enhance Chemical Safety in the Labs, and the objective of these workshops were to provide refresher training for current chemical spill responders, train new responders, and to provide a hands-on experience for new lab staff interested to know more about the chemical spill response procedure.

2 workshops were conducted on 20 April 2023 and 9 November 2023. The participants welcomed the conduct of the workshop as they had the opportunity to gain practical experience by simulating the use of chemical spill kit items and neutralisers to treat a spill in a simulated spill scenario.
