

Safety Awareness Game in September 2023

“LabSafe detective challenge-Spot the safety slip-ups!”

The safety committee created a safety awareness game which required the participants to analyse lab photos to identify and spot chemical safety lapses.

This was in line with the Department’s safety and health objectives for 2023 on Enhancing Chemical Safety in the Labs. The aim was to engage lab staff and students, and to use their safety knowledge and observational skills to pinpoint hazards and procedural errors.

The participants consisting of senior lab staff and new staff found the game interesting and fun. Some worked in groups to look for the safety mishaps in the photos together, and new staff had the opportunity to enhance their chemical safety awareness. Through this programme, safety culture was strengthened in the labs.

Runner-Up Prize winner
Peter Li

LabSafe detective challenge- Spot the safety slip-ups!

Winners

1st Prize: \$60 Fairprice Voucher

2nd Prize: \$50 Fairprice Voucher

3rd Prize: \$40 Fairprice Voucher

5 Runner-Up Prizes: \$30 Fairprice Voucher

Runner-Up Prize winner
Abbie Tan

Runner-Up Prize winner
Chung Chee Hooi

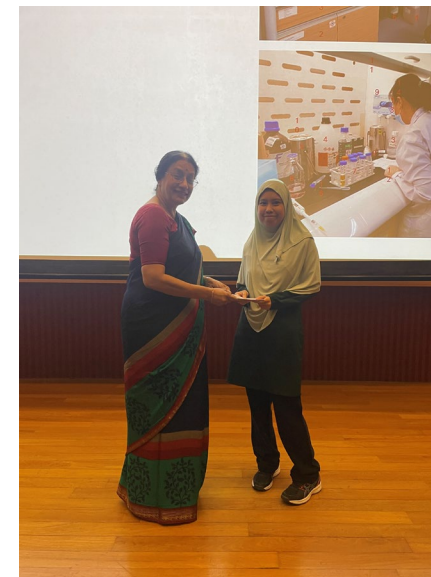

1st Prize winner
