

Master of Science (Critical Care Nursing) (MScCCN)

TRAINING TOMORROW'S NURSING LEADERS

Overview of the Programme

NUS Nursing's new Master of Science in Critical Care Nursing is designed for active nurses with a Bachelor's degree working in acute hospital ICU settings who want to specialise and lead in critical care.

This work-study programme blends theory, clinical immersion, leadership training, research, and infection control, equipping nurses with advanced skills to deliver high-quality care and drive change in critical care. With hands-on experience and inter-professional collaboration, our graduates will be prepared to mobilise teams and optimise patient outcomes in critical care settings.

Learning Outcomes

- Apply advanced critical care nursing knowledge to assess and manage critically ill patients.
- Demonstrate expert clinical judgment in diverse healthcare settings.
- Use evidence to enhance practice and patient outcomes.
- Implement evidence-based interventions and integrate new technologies.
- Collaborate effectively with healthcare teams.
- Lead high-quality critical care in leadership roles.
- Provide culturally competent, empathetic care.
- Mentor and support professional development in critical care.
- Drive initiatives to improve outcomes and care quality.
- Advocate for ethical decision-making in practice.
