

# Master of Community Health (MCH)

SHAPING NURSING LEADERSHIP

# Overview of the Programme

With evolving demographics and increasing healthcare demands, the Master of Community Health programme equips professionals to address ageing populations and chronic diseases. It provides a multidisciplinary platform for individuals from various fields to acquire and apply new knowledge, drive innovation, and collaborate in tackling global health challenges.

## **Learning Outcomes**

- Develop a comprehensive understanding of community and integrated health principles, theories, and models.
- Collaborate effectively across healthcare disciplines, integrating medical, social, and behavioral aspects to address complex health challenges.
- Analyze health data, assess community needs, and apply advanced analytical methods to design and implement evidence-based interventions.
- Develop and implement innovative solutions that integrate medical care, public health, and social services to improve health outcomes.
- Apply strategies for community engagement, empowerment, and capacity-building to foster sustainable health improvements.
- Utilize health information technology and digital solutions to enhance healthcare delivery and data management.
- Design effective health communication strategies and educational materials to promote health literacy and behavior change.
- Demonstrate leadership in managing healthcare teams and initiatives addressing social and environmental determinants of health.
- Uphold cultural and ethical competence, addressing health disparities and advocating for health equity.
- Apply a global and population health perspective, recognizing the interconnectedness of health challenges across diverse populations.
