

# GUEST LECTURER: JOHN A DENT

MEd MD FHEA FRCS (Ed)

AMEE International Relations Officer  
Hon Reader in Medical Education & Orthopaedic Surgery  
University of Dundee  
UK

Dr John Dent from AMEE, Dundee, will be highlighting three topics in medical education; one 40 years old, one in current debate and one looking to the future.

The SPICES model of education strategies (Harden et al 1984) still has interesting applications for current curricular design.

Outcome-based education remains very much on the agenda as medical schools and departments seek how best to implement its approaches.

The third, perhaps looking more to the future, addresses the question, "Can we teach our medical students outside the traditional teaching hospital?"

## "The SPICES approach to the development of teaching programmes in ambulatory care"

Date : Wednesday, 4 March 2015

Time: 1.00 to 2.00pm (\*Lunch will be served at 12:30pm)
