

# Certificate in Chronic Disease Management for Healthcare Professionals

*Enhance your knowledge of care for patients with chronic diseases in a community setting*

## OVERVIEW OF THE PROGRAMME

**Chronic diseases are long-term medical conditions that are generally progressive. Statistics show that Singapore's ageing population and adoption of unhealthy lifestyles have contributed to the increasing prevalence of chronic diseases.**

**This course is designed for healthcare professionals caring for patients with chronic diseases in the community setting.**

- Identify drivers and challenges shaping the healthcare environment
- Explain the characteristics of common chronic diseases
- Describe the clinical manifestations, medical, nursing and pharmacological management of common chronic diseases
- Discuss self-management strategies for clients with common chronic diseases
- Describe available support for clients with common chronic diseases and their carers
- Apply motivational interviewing skills when interacting with clients
- Apply effective strategies in health education and health promotion
- Recognise the importance of empowering patients to self-manage chronic conditions.

## WHO SHOULD ATTEND

- Healthcare professionals such as nurses and allied health professionals who engage in patient education and developing competencies of students and professionals.

## DURATION OF COURSE

- Over 5 days
- 9am to 5pm daily
