

Dr Leong Sai Mun
Research Assistant Professor
Department of Pathology
NUS Yong Loo Lin School of Medicine

Dr Leong Sai Mun is currently a Research Assistant Professor in the NUS Department of Pathology. He has 24 years of experience (since 1999) in the field of molecular biology and was trained in use of xenograft mouse model since 2000.

For his current research studies, Dr Leong draws on his broad-based educational background in life sciences, which incorporated teachings in evolutionary biology, natural sciences and cell & molecular techniques, as well as his postdoctoral training in molecular neurology and oncology. For the past eight years, PI has also ventured into the field of game theory and socio-biology, and works closely with his collaborator in USA to apply the principles of game theory to the study of oncology.
